TESTING

NOTE: Testing is not available from manufacturer.

REMOVAL & INSTALLATION

POWER MIRROR MOTOR

Removal & Installation

1) Remove mirror glass by pressing on lower edge of mirror until cogs can be seen in slit in bottom of mirror assembly. Using a screwdriver, move cogs to the left and lift out mirror glass. See Fig. 2.

2) Remove 4 screws and lift out motor. See Fig. 3. Disconnect wiring. To install, reverse removal procedure.
